Professional Summary

Full Stack PHP Developer with 7+ years of experience designing, building, and maintaining business-critical web applications, including large-scale fintech CRM platforms and cloud-based SaaS solutions.

My core expertise includes PHP, Symfony, MySQL, JavaScript, and React, with hands-on experience in backend development, REST APIs, webhooks, RBAC, SQL optimization, cloud infrastructure, application security, email infrastructure, and production troubleshooting.

I enjoy solving complex technical challenges, improving existing systems, and building reliable, maintainable software that delivers long-term business value.

Technical Skills

- **Languages:** PHP, JavaScript, TypeScript
- **Frameworks:** Symfony, React, Twig, Doctrine ORM
- **Databases:** MySQL, PostgreSQL, Amazon DynamoDB
- **Cloud & Infrastructure:** AWS, Docker, Redis, Linux, Nginx
- **Backend & Integration:** REST APIs, Webhooks, RBAC, SMTP, IMAP
- **Tools:** Git, Composer, Postman, Cloudflare, WHM, cPanel

Professional Experience

DevYard Ltd. (Finantick) • Full Stack PHP Developer

Jun 2025 – Present

- Develop and enhance a large-scale fintech CRM platform using PHP, Symfony, MySQL, JavaScript, Twig, HTML, and CSS.
- Design and implement CRM features for brokers, administrators, and back-office teams.
- Build REST APIs and integrate third-party services through REST APIs and webhooks, including payment providers (PSPs), email services, and lead validation solutions.
- Design and extend a complex RBAC permission system across multiple CRM modules.
- Optimize SQL queries, improve backend performance, and enhance application reliability through atomic database updates.
- Improve application security by implementing access control enhancements and addressing security vulnerabilities, including stored XSS.
- Design and improve email infrastructure, including SMTP, IMAP, templates, signatures, permissions, and notification workflows.
- Migrate document storage to AWS cloud storage and support Node.js services for real-time pricing updates, including PM2-managed deployments.

O.M.C. Computers & Communications • Full Stack PHP Developer

Feb 2021 – Sep 2023

- Developed and maintained cloud-based web applications using PHP, React, JavaScript, HTML, and CSS.
- Worked within the SaaS & Infrastructure team, contributing to cloud infrastructure and Servers & Networks components.
- Led development of a security-focused project leveraging AWS services and networking technologies to mitigate unwanted traffic and reduce server load.
- Integrated MinIO object storage to support internal services and report management.
- Delivered UI improvements for the company's billing platform and contributed to cross-team development initiatives.
- Developed responsive email templates using MJML.
- Wrote PHPUnit tests, maintained technical documentation, and collaborated within an Agile development environment.

Soft&Hard Prototyping • Frontend Developer

Jun 2020 – Sep 2020

- Developed web applications using React, Bootstrap, REST APIs and Git.

SCE • Java Mentor

Nov 2019 – Mar 2020

- Mentored students in Java, OOP and software engineering fundamentals.

Soft&Hard Prototyping • Frontend Developer

Oct 2017 – Jul 2019

- Developed web and mobile projects, browser extensions and UI designs.

Education

B.Sc. Software Engineering - Sami Shamoon College of Engineering (2016-2020)

Certificates

- HackerRank Frontend Developer (React)
- React - The Complete Guide (Next.js & Redux)
- Understanding TypeScript

Languages

English • Hebrew
